Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 38-40, drawn to a method and an apparatus for recording digital data codes in an information storage medium, classified in class 369, subclass 59.24.
- II. Claims 30-33, 34-37, drawn to a method and an apparatus for reproducing digital data codes stored on an information storage medium, classified in class 369, subclass 53.31.
- III. Claims 28-29, drawn to a storage disk structure, classified in class 369, subclass 275.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as with CD player without recording feature.

Invention III links Inventions I and II and would be examined together with any selected Inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
